

**Citizen's Petition to the elected officials of the
Santa Clara Valley Water District, Cities and County of Santa Clara**

I am a resident and voter in Santa Clara County. I know the water district has been a water supply and flood control agency for many years, and the land use agencies have focused on development, but to me, having natural and environmentally healthy streams is just as important.

I'd like my neighborhood to have a living stream with fish and trees and birds. And I want trails that are designed not to harm the ecosystem so I can see and enjoy our creeks.

I want you to do everything you can to enable this to happen, including making Stream Restoration (with trail access) a high priority in your budgets and working together to develop Riparian Corridor Master Plans that provide a long term vision for our creeks and a blueprint for how to realize that vision.
